Daily Standup Notes for CSCC01 (Calypso)

[Jun 5, 2023] - Sprint 1 Standup #1 (held over Discord):

This was the first standup meeting of Sprint #1, and we used this time to plan out tasks and work on the Iteration 1 Planning Document. We went over all the tasks that should be worked on this Sprint and each person assigned a task of their choice to themselves. Here are the results:

Login and Registration page - Arielle
Landing page - Cassandra
Home page - William
Discover page / Navigation page - Maaneth
Product page - Shadman
Bidding page - Austin
User / Artist page - Tasif

We plan to meet again tomorrow to discuss the time/difficulty of each task, and to discuss the user stories/features corresponding to each task that should be worked on this Sprint.

[Jun 7, 2023] - Sprint 1 Standup #2 (held over Discord):

William
Worked on today: Reviewed some merge requests, and was working on other assignments
Plan to do tomorrow: Plan to start working on Home Page tomorrow
Blockers/Problems:

Arielle
Worked on today: Worked on designing the login page and breaking it down (on paper) into different sections so that coding will be easier tomorrow
Plan to do tomorrow: Start coding of login page
Blockers/Problems:

Cassandra:
Worked on today: Started UI for landing page
Plan to do tomorrow: Plan to continue tomorrow
Blockers/Problems:

Tasif
Worked on today: Worked on UI for User profile page
Plan to do tomorrow: Plan to finish by end of this week
Blockers/Problems:

Maaneth
Worked on today: Worked on basics of discovery page (showing the categories and images)
Plan to do tomorrow: Plan to continue working on it tomorrow
Blockers/Problems:

Shadman
Worked on today: Researching and learning React. Made a design diagram for what the Product page should look like.
Plan to do tomorrow: Plan to start implementing tomorrow
Blockers/Problems:

Austin
Worked on today: Setup router paths on App.tsx file for all the pages we are currently working on. Researched components
Plan to do tomorrow: Plan to add components for bidding page
Blockers/Problems:

[Jun 8, 2023] - Sprint 1 Standup #3 (held over Discord):

William
Worked on today: Started coding components for the home page, specifically the header navigation bar
Plan to do tomorrow: Plan to continue coding the components and home page
Blockers/Problems:

Arielle
Worked on today: Started coding login page

Plan to do tomorrow: Plan to finish login page by tonight, and plan to finish the register page tomorrow
Blockers/Problems: Installing needed packages, but resolved now.

Cassandra
Worked on today: Finished working on basics of landing page and completed all user stories relating to Landing Page for Sprint 1
Plan to do tomorrow: Plan to add more features and components to the landing page
Blockers/Problems:

Tasif
Worked on today: Working on UI for profile page
Plan to do tomorrow: Continue working on UI for profile page
Blockers/Problems:

Maaneth
Worked on today: Worked on components and styling of Discover page
Plan to do tomorrow: Continue working on Discover page
Blockers/Problems:

Shadman
Worked on today: Didn;t work on project, working on other assignments
Plan to do tomorrow: Plan to start coding tomorrow, plan to finish around weekend
Blockers/Problems:

Austin
Worked on today: Testing around with formatting and styling for the bidding page.
Plan to do tomorrow: Plan to finish basics tonight and by tomorrow
Blockers/Problems:

[Jun 12, 2023] - Sprint 1 Standup #4 (held over Discord):

William
Worked on today: Pushed changes for navigation bar. Working on homepage components and design
Plan to do tomorrow: Plan to continue working on home page
Blockers/Problems:

Arielle

Worked on today: Finished UI for registration page and did some navigation stuff.
Plan to do tomorrow: Plan to test some registration input/output
Blockers/Problems:

<u>**Cassandra**</u>
Worked on today: Merged landing page with main, completed all tasks for this sprint.
Plan to do tomorrow: All tasks finished for this sprint.
Blockers/Problems:

<u>**Tasif**</u>
Worked on today: Finished UI for profile page and working edit profile button. Adding some functionality to the buttons.
Plan to do tomorrow: Plan to continue working on above
Blockers/Problems:

<u>**Maaneth**</u>
Worked on today: Working on discover pages, and making pages for different categories. Made image components
Plan to do tomorrow: Working components for digital images and search bar.
Blockers/Problems:

<u>**Shadman**</u>
Worked on today: Working on UI of product page
Plan to do tomorrow: Plan to continue working on above
Blockers/Problems:

<u>**Austin**</u>
Worked on today: Working on the UI part of the bidding page. Basics are finished, just working on styling.
Plan to do tomorrow: Plan to continue on bidding page
Blockers/Problems: Might need some help with components

[Jun 14, 2023] - Sprint 1 Standup #5 (held over Discord):

<u>**William**</u>
Worked on today: Completed and merged in all homepage and component changes.
Plan to do tomorrow: All stories for this sprint finished, but will most likely do some UI work for some components
Blockers/Problems:

Arielle
Worked on today: Added logo to login page. Have to make the register page synced
Plan to do tomorrow: Plan to finish above
Blockers/Problems:

Cassandra
Worked on today: Fixed the design of landing page a bit and added more pictures
Plan to do tomorrow: Stories for sprint already finished, but plan to do some UI touch ups
Blockers/Problems:

Tasif
Worked on today: Added functionality to the edit profile page button
Plan to do tomorrow: Profile page touch ups
Blockers/Problems:

Maaneth
Worked on today: No changes, helped Austin and Cassy a bit
Plan to do tomorrow:
Blockers/Problems:

Shadman
Worked on today: Functionality of product page has been coded and pushed
Plan to do tomorrow: Need to merge changes into main, and will also plan to implement the changes suggested from feedback during standup
Blockers/Problems:

Austin
Worked on today: Edited the purchase page and added another page for bids
Plan to do tomorrow: Bidding page touch ups
Blockers/Problems:

[Jun 30, 2023] - Sprint 2 Standup #1 (held over Discord):

William
Worked on today: Added a page for displaying all artworks
Plan to do tomorrow: Plan to finish up the UI for above and then also get started on the page to display all audio based products

Blockers/Problems:

<u>Arielle</u>
Worked on today: Researched which database to use for users
Plan to do tomorrow: Decide and look over with Tasif
Blockers/Problems:

<u>Cassandra</u>
Worked on today: Worked on messaging system
Plan to do tomorrow: Plan to continue working on messaging system
Blockers/Problems:

<u>Tasif</u>
Worked on today: Made UI changes to profile page
Plan to do tomorrow: Research databases for users
Blockers/Problems:

<u>Maaneth</u>
Worked on today: On a flight
Plan to do tomorrow:
Blockers/Problems: Will be out of country in a different time zone

<u>Shadman</u>
Worked on today: Nothing (studying for midterm)
Plan to do tomorrow: Start looking for payment apis to implement into our project
Blockers/Problems:

<u>Austin</u>
Worked on today: Worked on and added an error page
Plan to do tomorrow: Will be working on and adding possible pages related to bidding and products
Blockers/Problems: No internet for the next 7 days

<u>[Jul 3, 2023] - Sprint 2 Standup #2 (held over Discord):</u>

<u>William</u>
Worked on today: Added an all products page to show all products.
Plan to do tomorrow: Plan on implementing connection from frontend of homepage to backend DB
Blockers/Problems:

Arielle

Worked on today: Looked into reorganizing the JIRA, and also researched whether to use MongoDB or Neo4j for user authentication. Made schema and did some testing with user authentication

Plan to do tomorrow: Plan to finish user authentication with whatever DB decided in this standup

Blockers/Problems: Waiting on the final choice of DB before she can finish implementing user authentication

Cassandra

Worked on today: Worked on messaging UI

Plan to do tomorrow: Plan to work on websockets and messaging UI

Blockers/Problems: Having some troubles with WebSockets so will look into it

Tasif

Worked on today: Researching DB with users and discussed with Arielle and decided on MongoDB for users

Plan to do tomorrow: Start working on user schemas

Blockers/Problems:

Maaneth

Worked on today: Worked on testing out Neo4j and MongoDB related calls. Tested with some use cases to see which one was better

Plan to do tomorrow: Plan to decide with group on which DB we will be using and start implementing features for the discover and product recommendation services

Blockers/Problems:

Shadman

Worked on today: Looked at different payment APIs and found PayPal or Stripe to be best choices (leaning towards Stripe).

Plan to do tomorrow: Will look more into payment APIs and will start implementing soon

Blockers/Problems: Have a business midterm tomorrow so will get started on Wednesday

Austin

Worked on today: Worked on UI changes for the error page

Plan to do tomorrow: Work on some offline bidding page features

Blockers/Problems:

[Jul 4, 2023] - Sprint 2 Standup #3 (held over Discord):

William
Worked on today: Discussed with Maaneth about which database would be best. Also researched more about Neo4j vs MongoDB and how to use them together
Plan to do tomorrow: Plan to create a Neo4j database and test whether we can insert/retrieve values from Neo4j in the application
Blockers/Problems:

Arielle
Worked on today: Worked on user authentication service and created user schema. Requests to server for user authentication caused error
Plan to do tomorrow: Will try to resolve the error and finish authentication by tomorrow so she can start documents
Blockers/Problems: Error while getting requests for authentication

Cassandra
Worked on today: Continued working on messaging page
Plan to do tomorrow: Will continue to work on messaging page
Blockers/Problems: Have a midterm tomorrow so might not be able to work on stuff tomorrow

Tasif
Worked on today: Testing with reading data from MongoDB instead of hard coded data
Plan to do tomorrow: Nothing planned for tomorrow
Blockers/Problems: Midterm tomorrow so might not be able to work too much

Maaneth
Worked on today: Tested around with Neo4j and advanced queries regarding the product recommendation service. Have already planned out the product recommendation service algorithm, now just needs to implement it.
Plan to do tomorrow: Implement the product recommendation service method

Blockers/Problems: Very sick, might not be able to work for a while

Shadman
Worked on today: Nothing done today, studying for midterm for different class
Plan to do tomorrow: Will continue to work on product page and DB
Blockers/Problems:

Austin
Worked on today: Finally got wifi, pushed some changes regarding the product and bidding page.
Plan to do tomorrow: Sync up with Shadman with regards to the Transactions and Products, and see if he can take on any new tasks while being offline
Blockers/Problems: Will not have wifi again soon (don't know when it will come back)

[Jul 5, 2023] - Sprint 2 Standup #4 (held over Discord):

William
Worked on today: Midterm and rescheduled class today so couldn't do anything today
Plan to do tomorrow: Plan to create Neo4j database, connect to it, and pull/retrieve from DB in application
Blockers/Problems:

Arielle
Worked on today: Couldn't fix error from yesterday but should be on track to finish it tonight (using a different approach to the problem)
Plan to do tomorrow: Plan to finish user authentication and work on documents
Blockers/Problems:

Cassandra
Worked on today: Couldn't do anything because of midterm
Plan to do tomorrow: Finish messaging page
Blockers/Problems:

Tasif
Worked on today: Couldn't do anything because of midterm
Plan to do tomorrow: Try to connect to Neo4j and pull user information
Blockers/Problems:

Maaneth

Worked on today: Set up Neo4j database and inserted mock data and worked on algorithm
Plan to do tomorrow: Continue to work on product recommendation algorithm
Blockers/Problems: Still sick, but recovering

Shadman
Worked on today: Started working on payment services
Plan to do tomorrow: Plan to finish up payment services implementation
Blockers/Problems: Cat is sick, so spending time tending to cat

Austin
Worked on today: No contact with Austin since he has no wifi right now
Plan to do tomorrow:
Blockers/Problems:

[Jul 6, 2023] - Sprint 2 Standup #5 (held over Discord):

William
Worked on today: Created a Neo4j DB for the products. Worked on connecting the DB to the application
Plan to do tomorrow: Plan to finish all the connection tasks. Will also try to make it so that we are able to insert/retrieve values from the Neo4j DB
Blockers/Problems:

Arielle
Worked on today: Finished the backend files for the user authentication, and was able to send users to the MongoDB
Plan to do tomorrow: Finished all tasks for this sprints, will work on documents
Blockers/Problems:

Cassandra
Worked on today: Did the mock data and schemas for the messaging page. Around half way done
Plan to do tomorrow: Try to finish messaging page tomorrow
Blockers/Problems:

Tasif

Worked on today: Made a Neo4j database and added mock data to it. Made some routes, controllers, models to create/add new users.
Plan to do tomorrow: Try to do pulling/adding from front end
Blockers/Problems:

Maaneth
Worked on today: Worked a little on the product recommendation algorithm
Plan to do tomorrow: Plan to finish the recommendation algorithm/method
Blockers/Problems:

Shadman
Worked on today: Found a way to use Stipe API for free after reading a lot of Stipe documentation. Also found a way to test payments with Stipe. Working on implementing this service into the application
Plan to do tomorrow: Plan to finish transaction page and integrating Stipe API into our app
Blockers/Problems:

Austin
Worked on today: No contact (he has no wifi)
Plan to do tomorrow:
Blockers/Problems:

[Jul 11, 2023] - Sprint 3 Standup #1 (held over Discord):

William
Worked on today: Finished the all products page and connected it to the DB.
Plan to do tomorrow: Work on the sort-by feature on the product page
Blockers/Problems:

Arielle
Worked on today: Had doctors appointment and couldn't work on anything
Plan to do tomorrow: Should be able to start on hashing passwords for user authentication
Blockers/Problems:

Cassandra
Worked on today: Couldn't work on tasks (had classes and other work)

Plan to do tomorrow: Work on messaging system
Blockers/Problems:

Tasif
Worked on today: Didn't start on any tasks today
Plan to do tomorrow: Work on frontend on profile page to adapt to the new all products page
Blockers/Problems:

Maaneth
Worked on today: No C01 work done today
Plan to do tomorrow: Plan to continue working on the product recommendation feature
Blockers/Problems:

Shadman
Worked on today: No C01 work done today
Plan to do tomorrow: Plan to start coding for the product page
Blockers/Problems:

Austin
Worked on today: No C01 work done today
Plan to do tomorrow: Plan to start working with Shadman for the Product/Bidding page
Blockers/Problems:

[Jul 12, 2023] - Sprint 3 Standup #2 (held over Discord):

William
Worked on today: Worked on backend implementation for the sorting/filter parameters for the all products page.
Plan to do tomorrow: Continue to work on above^
Blockers/Problems:

Arielle
Worked on today: Finished hashing passwords for registration page, and added comparison tests for the hashing passwords feature. Added user/password registration checking.
Plan to do tomorrow: Plan to start working on error checking and displaying, and also actual signing in of user
Blockers/Problems:

Cassandra
Worked on today: Worked on backend/API for messenger page. Created feature for chats between users and group chats.
Plan to do tomorrow: Adding and removing people for group chats
Blockers/Problems:

Tasif
Worked on today: Worked on separate routes for different users, and also added a different product list for music on the user profile page.
Plan to do tomorrow: Continue working on the music list feature
Blockers/Problems:

Maaneth
Worked on today: Didn't work on any C01 things.
Plan to do tomorrow:
Blockers/Problems:

Shadman
Worked on today: Nothing done for C01
Plan to do tomorrow: Plan to start coding the backend for the transaction page. Will plan to work with Austin in the near future
Blockers/Problems:

Austin
Worked on today: Didn't work on any C01 things.
Plan to do tomorrow: Will return from vacation and will be back in Toronto tonight. Will be able to start working on tasks again.
Blockers/Problems:

[Jul 17, 2023] - Sprint 3 Standup #3 (held over Discord):

William
Worked on today: Finished the implementation of the filter buttons
Plan to do tomorrow: FInished all tasks for this sprint
Blockers/Problems:

Arielle

Worked on today: Had some errors with the Login page, so spent time fixing it.
Plan to do tomorrow: Styling the error response, and plan to finish login/register pages fully by tomorrow
Blockers/Problems:

Cassandra
Worked on today: API changes and interaction with users db, pushed changes to GitHub
Plan to do tomorrow: Work on messaging functionality
Blockers/Problems:

Tasif
Worked on today: Added add/remove artwork functionality to profile page
Plan to do tomorrow: Add and remove Music
Blockers/Problems:

Maaneth
Worked on today: Worked on pulling Music information from the database instead of hardcoding it. Pushed these changes to GitHub
Plan to do tomorrow: Continue to work on Music and Product recommendation service
Blockers/Problems:

Shadman
Worked on today: Started Stripe implementation into our own project. Encountered a problem where since we don't have a proper HTTPS protocol, a lot of features from Stripe were missing. Decided to use Stripe's own payment page instead as the new transaction page.
Plan to do tomorrow: Need to start working on product page and shopping cart so that he can start working on the Stripe tasks
Blockers/Problems: In order for Stripe checkout page to work, we need to first send in information to the page, but since the Product page is not fully setup yet, the information is not being sent through properly

Austin
Worked on today: Researching and planning out the bidding page. Did some UML diagrams to plan it out.
Plan to do tomorrow: Plan to start working with Shadman on Product page and Shopping Cart
Blockers/Problems:

William
Worked on today: Nothing for C01 since tasks are finished
Plan to do tomorrow: Add comments to my pages/methods
Blockers/Problems:

Arielle
Worked on today: Login and Registration pages are finished and errors are finished as well
Plan to do tomorrow: All tasks for this sprint are completed
Blockers/Problems:

Cassandra
Worked on today: Working on Messaging Page, and did some UI stuff
Plan to do tomorrow: Plan to keep working on messaging page
Blockers/Problems:

Tasif
Worked on today: Finished adding products to profile and pushed changes
Plan to do tomorrow: All tasks for this sprint are completed
Blockers/Problems:

Maaneth
Worked on today: Fixed a bug with the music API and added the music recommendation function
Plan to do tomorrow: Work on the art recommendation and the api function to filter songs by category
Blockers/Problems:

Shadman
Worked on today: Worked on fixing products and how they interact with database, making sure when you click on products you go to the proper product page
Plan to do tomorrow: Continue working on this
Blockers/Problems:

Austin

Worked on today: Was working on bidding page but met up with Shadman and started working on Product page and Shopping carts
Plan to do tomorrow: Plan to continue working on this, namely UI stuff
Blockers/Problems:

[Jul 20, 2023] - Sprint 3 Standup #5 (held over Discord):

William
Worked on today: Nothing, all tasks for sprint finished
Plan to do tomorrow: work on token for password reset (password reset is too hard)
Blockers/Problems:

Arielle
Worked on today: added redirection to successful submission page after registering
Plan to do tomorrow:
Blockers/Problems:

Cassandra
Worked on today: get from backend and display to frontend, send new message,
Plan to do tomorrow: create new message, real-time messaging
Blockers/Problems:

Tasif
Worked on today: research tokens for connecting login and profile page
Plan to do tomorrow: refactor edit profile functionality
Blockers/Problems:

Maaneth
Worked on today: finished music suggestion
Plan to do tomorrow: working on art suggestions
Blockers/Problems: limited wifi and different time zone

Shadman
Worked on today: connecting product page to db
Plan to do tomorrow: see all the other pages that have products and connect those to product page as well

Blockers/Problems:

Austin
Worked on today: shopping cart ui and functionality, implemented local storage to store products.
Plan to do tomorrow: work on backend and integrating/testing products to appear in the shopping cart.
Blockers/Problems:

[Jul 26, 2023] - Sprint 4 Standup #1 (held over Discord):

William
Worked on today: Finished and pushed homepage routing changes. Started work on seller dashboard/analytics.
Plan to do tomorrow: Plan to continue working on seller dashboard and analytics
Blockers/Problems:

Arielle
Worked on today: Finished the login and register redesign
Plan to do tomorrow: Fix nav bar on several pages & start discover page redesign
Blockers/Problems:

Cassandra
Worked on today: Finished logged in user messaging
Plan to do tomorrow: Going to start on real time messaging
Blockers/Problems:

Tasif
Worked on today: Changed user schema to include names.
Plan to do tomorrow: Plan to start working UI for messaging page
Blockers/Problems:

Maaneth
Worked on today: Worked on researching and looking into Google Analytics
Plan to do tomorrow: Plan to work on analytics page for Admins
Blockers/Problems:

Shadman
Worked on today: Worked on other courses

Plan to do tomorrow: Plan to start C01 Assignment so that he can devote all future time to C01 Project
Blockers/Problems:

Austin
Worked on today: Cart summary page that leads to transaction page. Summarizes all cart items that are to be purchased and gives user a chance to remove items they may not want to purchase. Includes total price.
Plan to do tomorrow: Set up database for bidding page. Will complete set up on react first.

Blockers/Problems: Might need someone to help me out with setting up a new database and to determine whether to use neo4j or mongo, due to limited wifi for the week.

[Jul 27, 2023] - Sprint 4 Standup #2 (held over Discord):

William
Worked on today: Finished the analytics/dashboard page for sellers. Added routing to actual products from the database to the home page.
Plan to do tomorrow: All tasks done for this sprint
Blockers/Problems:

Arielle
Worked on today: Worked on UI for landing page and figured out how to animate when scrolling.
Plan to do tomorrow: Continue working on UI for landing page.
Blockers/Problems: Have to spend some time working on the C01 assignment.

Cassandra
Worked on today: Started the real time messaging and worked on C01 assignment
Plan to do tomorrow: Plan to continue working on this
Blockers/Problems:

Tasif
Worked on today: Worked on C01 assignment
Plan to do tomorrow: Continue working on UI for messages
Blockers/Problems:

Maaneth
Worked on today: Finished working on the categories api for both music and artwork, finished the artwork recommendation api
Plan to do tomorrow: Continuing work on Analytics page for admins
Blockers/Problems:

Shadman
Worked on today: Worked on C01 assignment
Plan to do tomorrow: Help Austin on the assignment, so that they can start working on project
Blockers/Problems:

Austin
Worked on today: Worked on the backend for the bidding page.
Plan to do tomorrow: Plan to finish assignment so he can continue work on bidding page.
Blockers/Problems: Camping with limited wifi

[Jul 31, 2023] - Sprint 4 Standup #3 (held over Discord):

William
Worked on today: All tasks finished for sprint already finished
Plan to do tomorrow:
Blockers/Problems:

Arielle
Worked on today: Finished landing page and made changes to UI for header and footer
Plan to do tomorrow: Plan to make UI changes for profile page and maybe product/transaction page
Blockers/Problems:

Cassandra
Worked on today: Finished the real time messaging
Plan to do tomorrow: Plan on displaying online users
Blockers/Problems:

Tasif
Worked on today: Working on UI for message pages

Plan to do tomorrow: Continuing on above
Blockers/Problems:

Maaneth
Worked on today: Finished UI changes for some discover page
Plan to do tomorrow: Plan to continue working on UI changes for other Discover pages (i.e trending, beats, etc)
Blockers/Problems:

Shadman
Worked on today: Working on backend for payment pages
Plan to do tomorrow: Continue working on above
Blockers/Problems:

Austin
Worked on today: Worked on re-navigating bidding buttons to their respective id's. Also worked on bidding backend and attempted to make post requests work
Plan to do tomorrow: Fixing that, and adding a timer. Also might need help with linking to users
Blockers/Problems: Backend not working

[Aug 2, 2023] - Sprint 4 Standup #4 (held over Discord):

William
Worked on today: All tasks for sprint already finished
Plan to do tomorrow:
Blockers/Problems:

Arielle
Worked on today: Finished all tasks for the sprint, probably won't help around anymore since she has other work for other courses
Plan to do tomorrow: Will start working on documents
Blockers/Problems:

Cassandra
Worked on today: Finished all tasks for sprint, implemented online users status
Plan to do tomorrow:

Blockers/Problems:

Tasif
Worked on today: Finished updating the message page and did some work on the navigation bar. Finished everything for sprint
Plan to do tomorrow:
Blockers/Problems:

Maaneth
Worked on today: Worked on and finished the admin dashboard page. Also did work on UI for discover pages
Plan to do tomorrow:
Blockers/Problems:

Shadman
Worked on today: More than half way finished product tasks, stuck on some bugs
Plan to do tomorrow: Plan to debug code and help Austin with code
Blockers/Problems: Some bugs with product tasks

Austin
Worked on today: Did UI changes for bidding page, Did a lot of backend changes to the bidding page, and did database changes to accommodate bidding
Plan to do tomorrow: Plan to get work reviewed so tenable bidProduct creation on profile page
Blockers/Problems:

[Aug 3, 2023] - Sprint 4 Standup #5 (held over Discord):

William
Worked on today: All tasks finished for sprint
Plan to do tomorrow:
Blockers/Problems:

Arielle
Worked on today: All tasks finished for sprint
Plan to do tomorrow:

Blockers/Problems:

Cassandra
Worked on today: All tasks finished for sprint
Plan to do tomorrow:
Blockers/Problems:

Tasif
Worked on today: All tasks finished for sprint
Plan to do tomorrow:
Blockers/Problems:

Maaneth
Worked on today: Worked on UI for search
Plan to do tomorrow: Plan to finish UI and backend for search
Blockers/Problems:

Shadman
Worked on today: Finished Stripe implementation
Plan to do tomorrow: Help Austin finish his work now that Stripe is finished
Blockers/Problems:

Austin
Worked on today: Finished resolving bugs regarding the bidding. Products are now being able to be set as bid products
Plan to do tomorrow: Needs to add Stripe stuff and then he will be done bidding
Blockers/Problems:
